

400 AUTOVALVE

Pneumatic / High Pressure

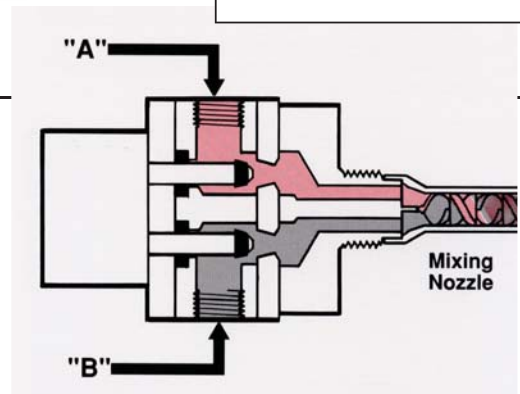

Autovalve shown with optional Triggerhandle

Designed for use with Exact's meter/mix and dispense systems, the pneumatically operated 400 Autovalve offers both durability and reliability. The A and B shut off pistons have a tapered Teflon seal. This unique design allows high flow with minimal maintenance. In addition, the seals can be adjusted without disassembly of the valve body.

Advantages:

- **Easy to Clean.** If cross contamination occurs, the manifold can be removed and cleaned without disassembly of the valve body.
- **Optional Stainless Steel Valve.** Recommended for corrosive acrylics or epoxies.
- **Lubricated Pistons.** The pistons are lubricated with Autogrease for moisture sensitive applications.
- **Hardened Pistons.** Resist abrasive adhesives.

Specifications:

Weight (Alum Valve & Manifold)1.6 lbs.
Weight (SS Valve & Manifold)2.5 lbs.
Pressure Rating3500 psi

Ordering Guide: A valve and a lower mix manifold must be purchased together. An optional Triggerhandle is available in both pneumatic & electric models.
