

# SMALL SHOT DISPENSING

Range of Luer tips available

EXACT Dispensing Systems offers a line of small shot dispensing systems that deliver concise, repeatable results. Using piston, blind rod or precision metering gear pumps, the optimal system can be configured to meet your production requirements.

These small shot MMD systems can be stand alone or integrated with our custom XYZ motion platforms to create automated cells.

## Applications:

Using plural component reactive resins (epoxies, urethanes, silicones) in demanding small-shot applications with sizes between .05 to 5 cc.

## Features:

- Shot sizes from .05 to 5.0 cc
- Beads, servo or pneumatic
- Discrete small shots
- Multiple drop shots to fill a volume
- Balanced manifolds
- Doming
- Vacuum encapsulation
- Gasketing
- No drip
- Piston, blind rod and gear solutions
- Incrematic small shot solutions from a large cylinder volume

Let our more than 30 years of experience go to work for you to develop a small shot dispensing system for you. Call us today for pricing and ordering information.
